Phase 1 of Playground Replacement on tap for 2015

Changes are coming to the pool and park area of Highland Creek Estates and Highland Meadows. The HOA board recently approved a phased approach for removing and replacing the existing playground equipment. During the pool upgrade, the decision was made to maintain the existing the playground equipment until funding was available. For 2015, the playground equipment replacement project will begin.

The first step in the process, the removal of the existing playground equipment, will occur in early January. Once the removal begins, there will be a period of several months where we will not have any equipment in the park area.

For Phase 1 of the playground project, the board has approved the purchase of one large piece of equipment, shown in the attached image. This will be the only new piece of equipment purchased for 2015.

Phase 2 of the project will occur in 2016 and will allow for the purchase of additional equipment, such as a swing set.

Our existing playground is heavily used but has reached the point of needing to be replaced. As with the pool, the board has worked to ensure the project is funded without the need of a special assessment.

If you have any questions about the playground project, please contact either Lora Compton or Patty Benda at SBB management or a board member. Contact information is available on the HOA website:
